Weekly PCB Cleanup Log

All contaminated debris from weekly clean up stored in 55gal DOT regulated drums located on site in a secure location. Clean up consists of walking entire site visually inspecting all surfaces with potential of paint chip contamination. Paint chips collected in a dedicated dust pan with a dedicated broom to ensure cross contamination does not occur.

Clean up on this day performed by: Seth Von Wald

(intermediate cleanups occur during times of inclement weather or as needed not posted in these logs)
